# PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

## COLD STORAGE REPORT, JANUARY 1, 1962

### Commodity summary

Refrigerated stocks on January 1, 1962 totaled 6.7 billion pounds, down 713 million from a month earlier. These holdings compare with 5.7 billion a year earlier and the 1957-61 average of 5.8 billion pounds. Freezer stocks of 3.6 billion were the largest ever for January 1, and the 3.1 billion pounds in cooler rooms were the second largest of record, exceeded only by the 3.2 billion held on January 1, 1958. Stocks of frozen turkeys, at 266 million pounds, were a record for the date as were the 435 million pounds of all frozen poultry. December net withdrawals of turkeys and of all poultry were larger than both the reduction of a year earlier and the 1956-60 average for the month. Frozen vegetable stocks, also, were at a new high for the date. Stocks totaled 1.2 billion pounds, 21 percent greater than those on January 1, 1961 and 35 percent greater than the 1957-61 average for the date. Frozen fruit supplies were reduced 33 million pounds during December to 531 million pounds on January 1, the largest frozen fruit inventory for the date. This time last year, 483 million pounds were stored, and 477 million pounds are average holdings for the date. Stocks of fresh apples were lowered to 34 million bushels, 6 million more than were stored on January 1, 1961, while pears, at 1.5 million boxes, were slightly lower than a year earlier. Orange concentrate stocks gained 1 million gallons to 18 million. These supplies were 29 percent more than these on January 1, 1961 and 6 percent above average for the date. Butter holdings showed little change from a month earlier but stocks of 225 million pounds compare with 76 million this time last year and average stocks of 58 million pounds. American cheese stocks declined 6 million pounds during December to 416 million on January 1. This was 42 percent more than the holdings of a year earlier and 31 percent more than average. Shell eggs totaled 37 thousand cases, the lowest for any month since January 1, 1951. Frozen egg holdings were down to 61 million pounds which compares with 64 million on January 1, 1961 and average holdings of 72 million pounds. Red meats in storage gained slightly during December. An increase of 2 million pounds brought warehouse supplies up to 488 million pounds. A year earlier, a gain of 13 million pounds brought stocks to 423 million pounds.

### Storage occupancy in public warehouses

Occupancy of both cooler and freezer space in public warehouses declined during December. Cooler occupancy at 59 percent on January 1, was 1-percentage point below December 1. This compares with 55 percent for both January 1, 1961 and the 5-year average. A reduction of 4-percentage points brought January 1 freezer occupancy to 78 percent. This is the highest level of use for the date since 1954 and compares with 71 percent for both a year ago and the January 1, 1957-61 average. Decreases in freezer occupancy were indicated in all regions except the South Atlantic.

### Cooler and freezer stock changes

Stocks of cooler-held commodities totaled 3.1 billion pounds on the first of the year, down 560 million from a month earlier. This reduction was 74 million pounds greater than during December 1960 but about average for the month. Holdings of all cooler items were lowered seasonally except for gains in stocks of nuts, and dried and evaporated fruits. Freezer stocks totaled 3.6 billion pounds compared with 3.0 billion on January 1, 1961. Average stocks for this date are 2.9 billion pounds. December gains in stocks of butter, juices and pork were offset by the seasonal reductions in stocks of other frozen commodities which lowered total freezer weight 152 million pounds.

### Dairy products

Warehouse holdings of butter advanced 1 million pounds during December to 225 million pounds on January 1. A year earlier, butter stocks were 77 million pounds and the 5-year average holdings are 58 million pounds. Government-owned butter reported on January 1 totaled 180 million pounds, leaving 45 million pounds in commercial channels which compares with 21 million pounds last year and the January 1957-61 average of 25 million pounds. American cheese stocks totaled 416 million pounds on January 1, a decline of 6 million pounds from a month earlier. This inventory was 42 percent

above a year ago and 31 percent above the 5-year average. January 1 stocks of cream totaled 8 million pounds, down 2 million from a month before. The average December reduction is 3 million pounds.

#### Vegetables, fruits, and juices

Frozen vegetable stocks declined from 1,267 million pounds on December 1, 1961 to 1,193 million on January 1, 1962. The net withdrawal of 74 million pounds compares with 34 million during December 1960 and 54 million, the average December reduction. Stocks were at a record high for the date, a pattern that prevailed during all of 1961. Holdings of frozen vegetables totaled 984 million pounds on January 1, 1961, while average holdings for the date are 883 million pounds. Fresh fruit holdings were reduced seasonally. Stocks of apples were down 10 million bushels from a month earlier to 34 million on January 1. A year earlier, 28 million bushels were stored, while average stocks are 33 million bushels. Holdings of pears were reduced to 1.5 million boxes compared with 1.7 on January 1, 1961 and average stocks of 2 million boxes. Frozen fruit supplies, at 531 million pounds, were 10 percent above those of January 1, 1961 and 11 percent greater than average. During December, holdings of all frozen fruit items were reduced seasonally except apples, which increased 10 million pounds to 53 million. Reductions in the other fruits ranged from 1 to 16 million pounds. Strawberries were down to 151 million pounds, 13 percent below average. Orange concentrate stocks increased 1 million gallons during December raising warehouse supplies to almost 18 million gallons. On January 1, 1961, stocks totaled 14 million gallons and 17 million gallons are average for the date.

#### Poultry and poultry products

Holdings of total poultry on January 1 totaled 435 million pounds, a record for the date, exceeding the previous January 1 high of 356 million pounds in 1945. This inventory is a reduction of 54 million pounds from the December 1 holding of 489 million pounds and compares with the decline of 52 million pounds during December 1960 and the average reduction of 40 million pounds. A year earlier, stocks totaled 301 million and the 5-year average is 323 million pounds. Turkey holdings on January 1 totaled 266 million pounds, the largest for the date but a drop of 52 million pounds from the December 1 high of last month. January 1 turkey inventories exceeded the previous record for the month by 89 million pounds. A seasonal reduction in shell egg stocks of 46 thousand cases brought holdings to 37 thousand cases, the lowest on record since January 1, 1951. Frozen egg stocks were reduced by 9 million pounds during December to total 61 million pounds on January 1. Last year at this time, holdings were 64 million while the January 1, 1957-61 average is 72 million pounds.

#### Meat and meat products

Red meats totaled 488 million pounds on January 1, up 2 million from a month earlier. These stocks were 15 percent above those of January 1, 1961 but were virtually the same as the 5-year average. The net gain of 2 million pounds compares with an increase of 13 million during December 1960 and the average increase of 48 million pounds. Beef stocks at 199 million pounds, were 17 percent above January 1, 1961 and 8 percent above the 5-year average. A 3 million pound net reduction in beef during December compares with a 1 million pound increase a year ago and the December 1956-60 average gain of 17 million pounds. Holdings of pork totaled 206 million pounds on January 1, a net increase of 13 million pounds during December 1961, compared with 17 million pounds a year earlier and the average increase of 28 million pounds. Total frozen pork increased 15 million pounds to 168 million pounds but total cooler pork declined 2 million pounds to 38 million pounds on January 1.

Table 11. --End-of-month stocks of certain commodities in storage owned  
by the Government 1/

Commodity	Unit	December 1956-60 average	December 1960	November 1961	December 1961 <u>2/</u>
		<u>Thou.</u>	<u>Thou.</u>	<u>Thou.</u>	<u>Thou.</u>
Butter, creamery . . . .	lb.	33,106	55,612	186,669	179,829
American Cheddar cheese.	lb.	78,502	564	51,342	48,989
Pork . . . . .	lb.	4,115	1,964	2,117	1,360
Beef . . . . .	lb.	9,389	2,584	2,484	2,678

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned and operated by them on which figures are not available.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.
